Porsche Club Championship – Bulletin 02-21 – 16/02.

Revision to Championship Regulation – 5.8.1.viii - Suspension

Championship Regulation 5.8.1.viii (Suspension) has been revised to allow for the use of an Aftermarket alternative to the Porsche GT3 lower suspension arms. This has been done to reflect a potential cost saving for competitors and for no other reason.

The revised wording is highlighted in *Italic* below.

Suspension

Regulation 5.8.1.viii - Boxster, Cayman and 996 / 997 models may use lower suspension arms from the GT3 model *or Eibach lower control arms – code: 572610K.* Control arms must be fitted to the correct side. Motorsport GT3 parts are not permitted. Track rod and track rod end ball joints must remain standard in all respects without spacers or alternative fittings.

This revised wording applies with immediate effect.
