

## **Production Numbers - 911 2.7, Carrera & 3.0 Register**

The 911 2.7, Carrera & 3.0 Register covers the normally aspirated 911 models produced from model year 1974 to model year 1977. The production road models manufactured in this period were specifically the 911 2.7, the 911S 2.7, the Carrera 2.7 and the Carrera 3.0 all of which were available as a coupe or Targa. The chassis numbers for these vehicles start with either: 9114, 9115, 9116 or 9117, if your VIN number starts with anything else it belongs to another register! Separate models of the 911S and Carrera 2.7 were produced for the North American market generally with lower powered engines (and even more so in California) due to emissions laws in the United States.

In the resource area is a list of all the road models and the total produced, I have also listed information I have on RHD versions sold in Australia and the UK. Unfortunately I only have details of the number of Carrera 2.7s sold in the UK but have full information for Australia. There were also small numbers of RHD cars supplied to markets such as Hong Kong as well as some supplied in Germany and other LHD countries but to British RHD specification.
