Porsche Club Championship – Bulletin 01-21 – 27/01.

Clarification – Championship Regulation – 5.7.2

Championship Regulation 5.7.2 was included in the Championship Regulations in 2019, to apply to all models. Regrettably, it was highlighted in the same colour as regulations which are specific only to the Class 3 Boxster Cup cars, leading to possible confusion.

To avoid any possible confusion or misunderstanding and to make it absolutely clear:

Regulation 5.7.2 states - Camshafts must be standard and camshaft timing must be set and remain within manufacturers standard settings.

This Regulation applies to all models within the Championship, without exception. This requirement is also stated within the questions asked in the Engine Declaration Form which is required for all Class 1 and Class 2 cars for 2021.
